Other: Team Management, Wordpress, Shopify, Git, Subversion, Agile, SEO, Photoshop, Sketch, Hubspot, Mailchimp

Experience

Frontend Developer @ Self Employed, Aug. 2013 – Present (Remote)

Javascript, Bootstrap, Emails, HTML, CSS, Responsive Design, Wordpress

- Developed front-end for custom sticker editor application
- Built responsive design for e-commerce client
- Management of Shopify & Wordpress e-commerce sites

Front End Developer @ Bucketlist, Nov 2016 - Aug 2018 (Remote)

Javascript, Bootstrap, Emails, HTML, CSS, Responsive Design, Wordpress, Hubspot, Marketing

- Worked remotely with an Agile team developing SAAS application using Angular
- Development & design of company's marketing site built on Wordpress
- Managing marketing team with content creation: e-mail newsletters, landing pages and blog posts.

Front End Developer @ Forge Media + Design, Jan 2014 – 2016 (Toronto)

Javascript, Subversion, HTML, CSS, Responsive Design, Wordpress, JQuery, Emails

- On-going maintenance & Canadian localization work for Apple (Canada).
- Created websites from design hand-off, taking the projects into production.
- Localizing e-mail blasts while maintaining design and optimizing layout, accounting for HTML e-mail browser & application limitations.

Front End Developer/Designer @ Site Nova, Feb 2011 – Aug 2013 (Toronto)

- Client-facing role as sole designer & developer for small team.
- Assessing client's business needs while doing wireframing/workflow planning
- Designing mock-ups in Photoshop then later writing HTML/CSS from scratch
- E-mail newsletter design, coding and lead list management
